First steps with Ucas in June

After the sixth year exams in June, there will be four sessions during school time where students will be introduced to the application procedure for UK universities. This does not oblige them to go forward with the application.

During these meeting we will be looking at:

- Examples of personal statement
- Practice writing
- How to choose a course
- Registration

This will give students the opportunity of thinking about universities over the summer so that they will be ready to make a decision on their return in September.

If they decide to proceed , the School will then request that the fee for processing the application be paid.

Please remember that there is an early deadline (7 October at the ES Varese to enable the coordinators to check if everything is OK) for completion of Oxford, Cambridge and all Medical Applications (official deadline 15 October).
