

Science Clinics

Science clinics for S6 and S7 will start Friday 16th October 12.15-12.55 in rooms D102 (biology/chemistry) and D002 (physics).

Pupils will be able to pop in to get advice linked to aspects of work which they would like further help with.

The aim of these clinics is to provide the opportunity for pupils to:

- Ask questions to check the understanding of a concept
- Work further developing a skill
- Discuss work not fully understood

This year it is also possible to book a support session.

To book, either the student or science teacher needs to send an email to the following address stating student's name, year and the theme to be reviewed.
