Calculators: instructions for examinations

24th October 2023
Dear Parents/Guardians,
Dear Students,

The European School of Varese recommends the *Numworks* calculator for Maths, Science Subjects, Geography and Economics examinations in S5, S6 and S7. If you have not ordered the *Numworks* calculator yet, please be informed that you can still have it delivered to your home by clicking on this link: https://www.numworks.com/it/acquistare/.

Software update

Your calculator should be equipped with the latest version of the software. To update your Numworks calculator with the latest version (v.21 or higher), go to this webpage and follow the instructions. Please make sure that your calculator is fully charged on the day of your examination.

Press-to-test mode for examinations

During examinations students must activate the *press-to-test* mode on their Numworks calculators *after* entering the examination room (instructions can be found below). It is important that students familiarise themselves with the *press-to-tes*t procedure before the day of the examination.

Kindest regards on behalf of the management & teaching staff,
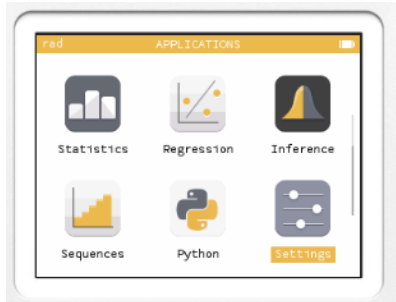

*Elizabeth McDonald*

Deputy Director Secondary Cycle

ES Varese

Calculator settings for examinations

Press-to-test Mode on the *Numworks* calculator

- *Enable Press-to-test mode __in__ the examination room (not before!).*
